## **SURF-FREESTYLE JUDGING RULES**

### **General Judging Rules**

#### Selection of judges

- (i) Only the WWT Sports Commission can make appointments and substitutions for an event.
- (ii) An attempt shall be made to ensure that no judge has a vested interest. There should not be family tie with a competitor.

### **Individual Scoring procedure**

- In order to bring the variety criteria into effect, the judges won't count a repeated manoeuvre.
- Judging Criteria are applied to score individual waves or tricks performed.
- The maximum of attempts per wave or trick will be up to the Head Judge. A notice must be made on the Official Notice Board 30 minutes before the heat starts.
- One or two panels of judges, each panel comprising an odd number of judges, no less than three (3) in number, shall score each heat. When there are five (5) judges, the highest and the lowest scores per wave or scoring category will be withdrawn and the average scores of the other three (3) judges will be counted as the final wave or category score.
- If a judge misses a wave or a trick they should place an "M" and that score will be given points equal to the average to the nearest thousandth of a point (0.005 to be rounded upward) of the other judges' scores.
- The judges shall award each competitor's wave or trick or judging category points on a scale from 0.1 to 10.0, broken into one-hundredths increments (e.g 6.444).
- Each individual score is rounded to the nearest hundredths place. The rounded scores are added to calculate the final score.
- The scores of the respective competitors shall be tabulated together to determine the winner: highest points wins.
- The weight given to waves, tricks and judging categories will be announced by the Head Judge and in the Official Notice Board at least thirty (30) minutes before the start of the heat.
- If a competitor lands the trick wet and doesn't lose the board, the judges will still give some credit to the trick. It's at the discretion of each judge to consider if it's a crash or a wet landing and to consider how much credit they will give to the trick, based on the commitment, technical difficulty, height, and time spent going up to the board.
- The credit given to wet trick landings is directly related to the risk factor involved in the execution of the trick. For tricks with a high degree of risk factor, judges won't deduct points for a wet landing.

A trick is a crash only if the majority of the judges consider it as a crash. If the minority of the judges consider a trick as a crash, those crashes will be withdrawn and the judges will reconsider the trick in the other scoring categories.

- A crash will be considered when:
- a competitor finishes the trick by pulling the leash to get the wing back.
- when landing a trick, a competitor is capsized, losing control of the board or wing.
- a competitor lands a jump but loses the wing.
- a competitor lands a jump but crashes the wing into water and completely stops.

Judges may give credit to a landed trick that is not a crash when:

a competitor lands a jump and crashes the wing into the water, but manages to relaunch it and keep riding without completely stopping.

The credit given to such a trick is directly related to the risk factor and technicality involved in the execution of the trick.

It's at the discretion of each judge to consider how much credit they will give to the trick.

### Overall Impression Scoring procedure

An overall impression score may be used in addition to the trick scores counting towards the final heat result. Criteria of variety, "wow" factor, smoothness, innovation, tricks landed vs crashes, and commitment impact the Overall Impression score. The points awarded to the Overall Impression score counting towards the final result per competitor during a heat will be announced by the Head Judge and posted in the Official Notice Board at least thirty (30) minutes before the start of the heat.

### Judging Criteria

#### Judging criteria for the waves

Judging Criteria are applied to score individual waves ridden. Each judge analyses the following major elements when scoring a wave:

- (i) Degree of difficulty of the manoeuvres performed.
- (ii) Commitment in the manoeuvres performed and the risk taken to perform them.
- (iii) Variety and combination of manoeuvres within the same wave.
- (iv) Speed and power.
- (v) Flow and linking of manoeuvres.
- (vi) Size of the waves ridden, directly linked to the degree of difficulty of manoeuvres performed in each wave.
- (vii) Innovative and progressive manoeuvres.

It's important to note that the emphasis of certain elements is contingent upon the location and the conditions on the day, as well as changes of conditions during the day.

Competitors must combine the major key elements in order to be awarded scores in the excellent range

The following scale may be used to describe a wave ridden that is scored:

- 0 – 1.9 = Poor;
- 2.0 – 3.9 = Fair;
- 4.0 – 5.9 = Average;
- 6.0 – 7.9 = Good;
- 8.0 – 10.0 = Excellent.

#### Judging criteria for Freestyle tricks

(i) *Height and amplitude* – The combination of height and amplitude of the tricks completed during the heat. As the wind conditions increase, this aspect will exponentially become more and more into consideration, but only when the height and amplitude are achieved along with risk factor and technical difficulty.

(ii) *Technical Difficulty* – The technical difficulty of tricks completed during the heat.

(iii) *Power* – The power during the execution of the tricks. Power will be considered as a combination of speed into the trick to pop and speed out during the landing, height and amplitude during the trick.

(iv) *Risk factor* – The risk factor is directly linked to the power, height, amplitude and technical difficulty of the jump, but also to the commitment of the competitor and physical challenge during the execution, duration of the critical moment, and energy on the execution.

(v) *Smoothness* – Smoothness and fluidity during the execution and landing of tricks completed during the heat.

(vi) *Innovation* – Tricks that have never been landed in competition before.

## Innovation factor

Extra coefficient for Innovation

Scores for innovative manoeuvres will be multiplied by a coefficient value depending on the level of difficulty to help incentivize innovations to be performed. After the average score comes up on the system, the Head judge will multiply it by the relative value for innovation tricks.

There are two extra coefficient values:

- The inverted manoeuvres will be multiplied by x 1.3
- The flat manoeuvres will be multiplied by x 1.2
